

## **Image Analysis & Performance Metrics Working Group**

The mission of the Image Analysis & Performance Metrics Working Group (IAPMWG) is to provide guidance, coordination, consensus building, and awareness regarding the development of algorithms and methods for quantitative analysis of tumors, related tissues and organs, and changes in response to disease progression and treatment, as well as to influence the development of objective methods and metrics for assessment of image analysis accuracy, reproducibility, and robustness. The IAPMWG will coordinate the collaboration between QIN members in this area.
